PROFESSIONAL PROFILE

Final-year Diploma in ICT (Applications Development) student at Sol Plaatje University with hands-on experience developing database-driven, web and desktop applications. Strong foundation in software engineering, computational mathematics, information systems, project management, big data and data analysis. Experienced with Java, Python, C#, ASP.NET Core, React, Django, SQL, MySQL, SQL Server, SQLite, Git/GitHub, Pandas and NumPy. Developed full-stack e-commerce, healthcare appointment, payroll, computer-vision attendance and data-analysis projects. Seeking an ICT internship, graduate programme or junior software/application development opportunity.

TECHNICAL SKILLS

Languages: Java, Python, C#, JavaScript, SQL

Frontend: React, Vite, HTML5, CSS3, Bootstrap

Backend: ASP.NET Core Web API, Django, REST APIs

Databases: MySQL, SQL Server, SQLite, Entity Framework Core, JDBC

Data & Analytics: Pandas, NumPy, Matplotlib, Microsoft Excel, data cleaning, statistical analysis, data visualisation

Development: Object-Oriented Programming, CRUD systems, authentication, database integration, debugging

Tools: Git, GitHub, NetBeans, Visual Studio, VS Code, Jupyter Notebook, Android development

EDUCATION

Sol Plaatje University — Diploma in ICT (Applications Development)

Final year | South Africa

Relevant academic areas: Software Engineering, Computational Mathematics, Project Management, Big Data, Information Systems, Data Analysis & Visualisation, Database Development and Application Development.

National Senior Certificate (Matric) — 2017 | Admission to Bachelor's Degree

SELECTED SOFTWARE & DATA PROJECTS

ShopSphere — Full-Stack E-Commerce Application

ASP.NET Core 8 • React • SQL Server • Entity Framework Core • JWT • Git/GitHub | GitHub: github.com/mxolisi78

- Built and shipped a full-stack e-commerce platform end-to-end, covering product catalogue, cart and checkout functionality, using an ASP.NET Core Web API backend and React/Vite frontend.
- Implemented REST API functionality, database persistence with Entity Framework Core and SQL Server, and JWT-based authentication.
- Used React Router and Axios to connect the frontend with backend services and structured the project for maintainable development.

CCAMS — Campus Clinic Appointment Management System

Java • NetBeans • MySQL • JDBC | GitHub: github.com/mxolisi78

- Designed and built a database-driven clinic appointment system serving three user roles (students, staff and administrators) with distinct permissions.
- Implemented authentication, role-based access, appointment booking, updating, cancellation and rescheduling.
- Built DAO-based database operations for users, students, staff and appointments using JDBC and MySQL.

Smart Attendance System (Computer Vision)

Python • Django • OpenCV • Computer Vision | GitHub: github.com/mxolisi78

- Built a computer-vision-based attendance system that automates employee attendance and reduces reliance on manual registers.
- Implemented and evaluated multiple face-detection approaches, including Haar Cascade, DNN-based detection and MediaPipe, with fallback detection mechanisms for robustness.

Payroll Management System

Python • Django • SQLite • HTML/CSS • Bootstrap

- Designed a modular payroll application spanning six functional areas — employees, departments, attendance, leave, payroll and reporting — as independent Django apps.
- Applied Django's structured application architecture and database-backed workflows to organise business functionality.

South Africa Education & Unemployment Data Analysis

Python • Pandas • NumPy • Matplotlib • Excel • SQLite

- Cleaned, transformed and combined South African tertiary education and unemployment datasets.
- Performed descriptive and numerical analysis and created visualisations including line and scatter plots.
- Calculated statistical measures including mean, standard deviation and correlation and exported analysed results to Excel/SQLite.

Personal Developer Portfolio

React • Vite • CSS • GitHub

- Built and deployed a responsive personal portfolio to showcase software, data and application-development projects.

WORK EXPERIENCE

Assistant Teacher (EA) — The GEM Combined School

2021–2022 | 10 months

- Supported teaching and learning activities and assisted learners with classroom tasks.
- Collaborated with teaching staff to maintain an organised and productive learning environment.
- Developed strong communication, teamwork, problem-solving, patience and organisational skills.

General Worker — HL&E

2018 | 10 months

- Performed assigned operational and general-support duties in a structured workplace environment.
- Worked effectively as part of a team while following workplace procedures and safety requirements.
- Demonstrated reliability, punctuality, adaptability and responsibility in day-to-day operations.

PROFESSIONAL STRENGTHS

Software development • Analytical thinking • Problem solving • Teamwork • Communication • Project collaboration • Database management • Adaptability • Time management • Attention to detail • Continuous learning

ADDITIONAL INFORMATION

Available for ICT internships and graduate/junior software developer programmes.

GitHub portfolio of projects available — see link above.
